So, if you ever want to replace your turf which is 8 years old, you have to use FieldTurf they are the Governing Board approved vendor (Sprint is the approved any longer). I called them and the cost would be \$32,000 for removal and new product with all logos, end zone (name) all field marking is \$418K to \$468K for a total of \$450k to \$500K

That is the total for field replacement and that is if nothing is wrong with the under carpet grade (which I think you are still good, maybe minor fixes if any)

For the field house depending on what he is wanting to put up, if it is the steel building it would be around \$350K (could have some additional cost for architect, or DSA).

Hope this helps.

I HATE FOOTBALL!!!!!!

So Mr Burner is at it again wants a ball park figure on the field house if he raises the money not time not materials the MONEY! What would it cost. Wasn't it already stated 350K? We purchased structure lying in the back but cost of everything to actually put it up.

Then if he raises money not material not time again MONEY what will it cost to have field turf replaced. Can I call sprint turf for cost or is that something that the district has to do?

You would think we are the BIG LEAGUE!!!
