Hi Frank:

Happy to discuss. Are you available for a call around 11 today ? Or after 2:00 ?

Tim

Subject: Turf Fields

Hey Tim,

Have not talked in a while. I have a few questions for you. I am working on the maintenance side of the house for a couple months and I am hearing that we are having some trouble with some of football fields with the turf pulling out. I spoke with Larry Jones and he showed me a machine you are using to glue the turf from the topside. Is it the Revolution we are having these issues? Can you tell me what exactly is happening so I can understand more of what repairs you are doing? With this glue process does this cause any slow down on the field draining?

Sorry I am asking so many questions but I did not know of this issue until now and I am just wondering if this was or is a factory issue and has it been resolved or is this something that may take place on all of our fields. Can you get back to me on this so I have a better understanding of why this is happening and do we need to discuss using a different product if this is going to continue to happen.

Thanks

Frank
