**Subject:** Ameca email to families

Hi TS Team,

Happy New Year! I'm thrilled to be onsite with you for the next several weeks, integrating Ameca into our teaching practices. Here is the email I sent to PB for their families with a couple of changes. Let me know if you have any questions!

**Subject:** Exciting Opportunity: AI-Enabled Instruction with Ameca

Dear Parent/Guardian,

We are excited to share an innovative opportunity for your student to participate in a research-based learning experience featuring Ameca, the world's most advanced AI-powered humanoid robot. As part of our ongoing efforts to explore the role of artificial intelligence in education, students at the Tierrasanta Resource Center will have the chance to engage in both one-on-one and small-group instruction facilitated by Ameca.

We are thrilled to be the first school in the world researching the use of physical AI as a teaching partner. This initiative is part of a research study examining how AI can enhance student engagement and learning outcomes. Your student's participation will contribute to valuable insights into the future of technology-assisted education. Ameca has been designed to support students with four different personas, *Sage* the Teacher, *Remi* the wellness coach, *Ari* the college and career planner, and *Lexi* the translator. To fully experience Ameca's capabilities and to get used to having a robot in the classroom, we will be introducing Ameca to students beginning the week of **January 12, 2026**. We plan to have Ameca onsite until Fall 2026.

We are eager to see how this experience enhances student learning and engagement, and we appreciate your support in making this an exciting and valuable opportunity for your student. If you have any questions, please feel free to contact your teacher.

Warmly,

**Cathryn Rambo**

Dean of Academic Affairs and Altus Studies
